POOL & SPA

INSPIRATION GUIDE

1

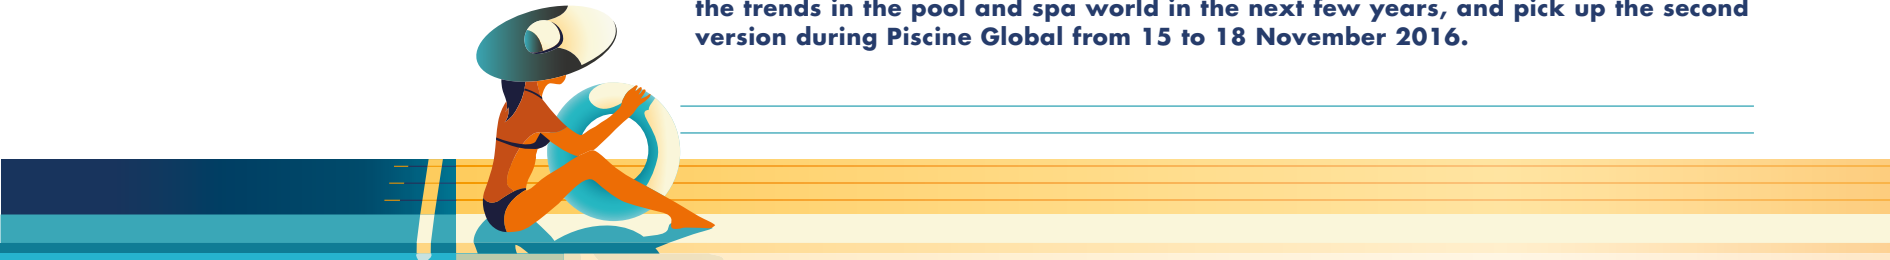

This guide is brimming over with bright ideas dreamed up by pioneering minds, and aims to provide inspiration for the outstanding pool and spa projects of tomorrow.

We live in an era of practical innovation, where pools and spas are adapted to each situation. These wellness products can now be completely controlled by their owners, adopting digital technologies to meet every need while making management effortless for the user. The 2.0 era is drawing this market in its wake, with new expectations focusing on connected pools and spas allowing all functions to be managed remotely by digital means.

Pools and spas are becoming genuine extensions to the home, and this guide presents a selection of leading-edge installations that reflect this trend. Design, discretion and harmonious integration are the watchwords for these projects, which adopt colours and materials inspired by nature to blend into their surroundings. Lighting plays an integral role, brightening up walls with crystals, embellishing liners with more economical and more sustainable light fittings, enhancing the colours of the water and making it sparkle.

Current trends reflect today's more sustainable approach to consumption, placing a focus on energy savings in the face of growing awareness of the need for more environmentally responsible behaviour. The primary purpose of pools is moving away from sports and leisure and towards comfort and well-being. Pools and spas are highly attractive wellness products offering a haven in which to relax, unwind and take a well-deserved break from the stress of everyday life.

Dive into this first version of our inspiration guide to find out what will be setting the trends in the pool and spa world in the next few years, and pick up the second version during Piscine Global from 15 to 18 November 2016.

wellness

noble materials
chromotherapy
music therapy

tranquillity
relaxation
ergonomics

1 – ALPHA INDUSTRIES • SALT CAVE

The combination of rough salt stone from the Himalayas, Ayous wood and Fungi wood veneering creates an incomparable salt-steam room. Its modern design blends ecology and noble materials to optimise pleasure for the eyes and the body.

→ www.alpha-industries.be

2 – ALPHA INDUSTRIES • GROBBENDONK SAUNA

A custom-built sauna equipped with a gas-fired stove for minimal energy consumption. Cladding in several wood styles and a wood veneer ecologically suited to saunas give this sauna incomparable style. With built-in chromotherapy and music therapy features, this sauna provides everything needed for ultimate relaxation.

→ www.alpha-industries.be

3 – ALPHA INDUSTRIES • CHALEUR LOUNGE INFRARED SAUNA

This cabin is equipped with a full-spectrum infrared heater patented by Alpha Industries. This revolutionary technology does not require any preheating, and is combined with ergonomic seats that adapt to each individual's anatomy. Muscle pain and skin problems disappear during this soothing, therapeutic experience leading to total relaxation.

→ www.alpha-industries.be

4 – PORTCRIL • PRIME SPA

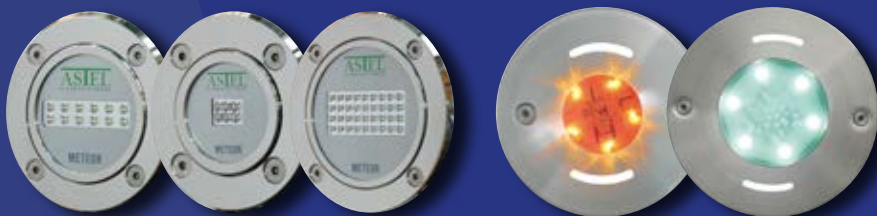

This spa is equipped with 6 made-to-measure seats, 110 jets, 5 pumps, an ozone and UV disinfection system, 2 diverter valves, touch screen control and automatic massage sequencing for guaranteed relaxation.

INSPIRATIONS LIGHTS

2016 2017

VIBRANT/PHOSPHORESCENT

1

1 – ASTEL • METEOR

This underwater lighting system features vibrant multi-coloured LEDs and is perfectly suited to any type of pool. Thanks to its thin, discreet stainless steel casing it blends easily into the pool surroundings.

→ www.astel-marine.com

2

2 – FLUVO • SCHMALENBERGER

An underwater spotlight that is economical, powerful and sustainable. It has a simple round or square-shaped stainless steel casing.

→ www.schmalenberger.de

3

3 – EZARRI MOSAICO • FOSFO COLLECTION

A range of mosaic tiles that give off a phosphorescent light, creating an original atmosphere. The tiles are treated with a special tint designed to glow after dark by releasing the light absorbed during the day.

LIGHT UP

2016 INSPIRATIONS 2017

SIMPLICITY

1

1 – KLEREO • KOMPACT

This pool automation and management project features a physical and chemical water treatment unit and an automated system to operate the pool equipment.

Water quality is improved and pool maintenance is made easier by this smart home system allowing pool maintenance processes to be controlled and managed remotely.

→ www.klereo.com

2

2 – SPA-PLUS • SMARTOP

This spa cover combines design, durability, safety and high-performance features. Equipped with a secure opening and closing system, the cover locks itself in the upright position

3

3 – AZURPOOL • GAMME RIVIERA

Ideal for the connected home of today, this home automation system cabinet can incorporate a swimming pool, allowing all of its equipment to be managed

4

4 – ABRISUD • MAGNET'CLIC

This pool enclosure features a new technology making it easy and safe to use: a magnetic fastening system which automatically locks as soon as someone enters the pool. The fastening brackets are embedded in the ground, ensuring seamless integration into the pool surrounds and leaving the charm of the pool completely intact.

→ www.abrisud.com

5 – DIFFAZUR PISCINES • AUGMENTED REALITY

This 3D augmented reality application provides a realistic representation of a virtual pool that can be projected in a garden to obtain a life-size model of a pool design. Simple, well-conceived ergonomics make it possible to create a dream pool in 12 stages, selecting the size, shape, options and decorative components from the list of pre-programmed features.

This app is the first of its kind in the pool industry.

COLOURS

Inspirations

2016

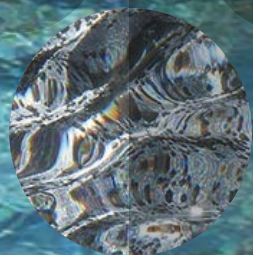

2017

1 – APF • DREAMLINER 2015 PEARLY WHITE LINERS

The printed liners in this range feature a varnished side with a pearly finish, enhancing the water surface and creating an impression of depth and a stunning colour that sparkles in the sunlight. The liner is available in Adriatic white, glacier blue, turquoise blue, pearl grey, volcano grey and graphite.

→ www.apf-france.com

2 – CARO'STYL • BALI GREEN TILES

These stoneware tiles in a highly sought-after colour transform any garden into an island paradise. The heavy-duty stoneware guarantees optimum strength, durability and frost resistance, standing the test of time.

→ www.carostyl.fr

3 – CARO'STYL • LAVA ROCK COPING

Stylish, on-trend lava rock is used for this natural black stone pool coping, because of its non-slip and heavy-duty properties.

INSPIRATIONS MATERIALS

MINERALS
CRYSTALS
MARBLE
QUARTZ
ETERNAL STONES

1 – DIFFAZUR PISCINES • QUARTZROC

This unrivalled hydraulic coating brings the strength and character of an eternal stone to pools and will appeal to all lovers of quartz. Hand-made by expert craftsmen in a single piece, the Quartzroc rendering is designed to provide a soft finish and unrivalled comfort without a single joint. It is available in light grey and light sand colours.

→ www.diffazur.fr

2 – DIFFAZUR PISCINES • NATURALROC

Ideal for submerged pool decks and “natural” pools, this coating consists of selected micro-gravel from rivers, giving it a texture that replicates the authentic, natural feeling of sand. It is available in two colours: lagoon sand or river grey.

→ www.diffazur.fr

3 – DIFFAZUR PISCINES • ARLEQUIN

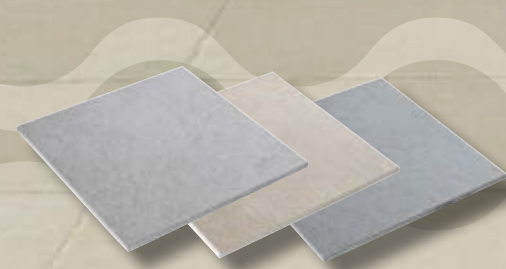

This two-colour “plaster” (cement- and marble crystal-based coating) replicates the look of marble to stunning effect. It is available in white/green and white/black.

→ www.diffazur.fr

4 – DIFFAZUR PISCINES • MARBREROC

This mineral coating used for decorating and finishing consists of natural-coloured marble crystals, special cements and reactive admixtures to obtain a high-performance hydraulic result. It is available in dark grey, dark sand and Alpine green colours.

→ www.diffazur.fr

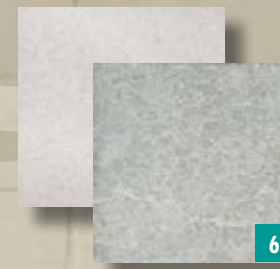

5

5 – FABEMI • ASTORIA

Through-coloured ceramic tiles, machine finished and non-porous for optimum durability, providing an ideal surface coating for pool decks.

→ www.carredarc.com

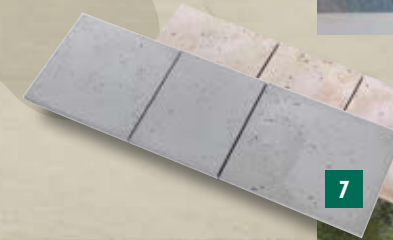

6

6 – FABEMI • CRECY COLLECTION

A collection of paving stones and copings made of natural limestone sourced in Croatia of the type used to build large paved areas in Venice. They have a brushed shot-blasted finish and are available in beige and grey-blue.

→ www.bradstone.fr

7

7 – FABEMI • JOUQUES COLLECTION

This collection of paving stones and copings made of reconstituted stone provide an excellent imitation of travertine stone. The stone is through-coloured and is frost-resistant, non-slip and non-heat conductive.

→ www.carredarc.com

INSPIRATIONS ENVIRONNEMENT 20

3 – TOGAMA • SILK, GEA, PASSPORT

These glass paste-based enamels and mosaics are obtained from recycling different types of glass. They provide great flexibility and are easy to customise when designing projects.

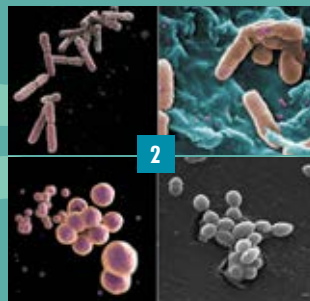

→ www.togama.com

1 – CORELEC • AKERON

Based on technologies originating in the aerospace, automobile and photovoltaic industries, this equipment combines a salt electrolysis system and a pH regulator. It withstands extreme weather conditions and guarantees that the water is completely disinfected without having to use chemicals.

→ www.corelec.fr

2 – CASALGRANDE PADANA • BIOS CERAMICS

Bios Antibacterial® Ceramics is a unique range of stoneware pool floor and wall lining products with the ability to eliminate 99.9% of the four main bacterial strains.

Bios Antibacterial® Ceramics are highly wear-resistant and stand the test of time, making them ideal for heavy-duty conditions in humid environments, such as changing rooms and decks at aquatic centres, wellness centres or spas.
